

Steri-Core™

Breaking the chain of infection
through innovation

who are **Steri-Core**TM

We design and manufacture easy clean, antimicrobial and antibacterial 'touch point' products using our unique Steri-Core material.

Our products can help prevent the spread of healthcare associated infections, by providing clinically proven antimicrobial protection thus making the surface germ free.

“our **mission**
Our mission is to develop
safe and effective
antimicrobial products
to protect mankind.”

Paul Cook (2nd from left), founder & inventor, receiving
The Worlds Best New Innovative Products award for Steri-Core in Dubai

our organisation

Our people are empowered to offer an unparalleled service, engage at a one-to-one level and are committed to deliver on their promises

case study

Milton Keynes Hospital is a modern 400-bed hospital that provides a full range of acute services to Milton Keynes and the surrounding areas

quick facts

- The Trust employs 3,000 staff
- Has beds for 400 patients.
- 70,000 people come to Accident and Emergency every year
- 20,000 elective patients, 200,000 outpatients, and deliver over 4,000 babies every year

the problem

- Having chairs within the hospital wards which were difficult to clean, remove dirt and bacteria
- Cross ward contamination
- Current chairs were not able to be cleaned with chlorine based cleaners or steam cleaners
- Chairs were failing for larger users and not withstanding the test of time

the solution

- Incorporating Steri-Core handles and chairs within the hospital building enabled their staff the ability to clean these products quickly and efficiently saving valuable time and cleaning costs.
- The antimicrobial properties of the chairs reduced the risk of cross ward contamination
- The guaranteed weight usage of the Steri-Core chairs (upto 25 stone) ensured no more damaged products or replacement chairs
- The hospital also benefited from our products' anti-microbial properties which has helped towards the prevention of outbreaks of HCAI's

total value of **chair requirements**
£160k

testimonials

Stories of people inspired by our antimicrobial products

We needed new chairs for our dining rooms, I can honestly say that the Steri-Core chairs are fantastic not only do they offer protection against infection to our residences they are so easy to clean after meal times. I would certainly recommend the chairs to all care homes across the UK.

Mr Steve Todd, Manager
NOTORO CAREHOME GROUP

We recently refurbished one of our surgeries and opted for the Steri-Core range of handles and chairs due to their unique Antimicrobial properties, the chairs and handles look great and with infection control high on our list of priorities, we could not have made a better choice. Will certainly be upgrading our other surgeries soon.

Mr Mark Thomas
Practice manager
Barton hall surgeries

We look forward to talking to you
